date rape drugs

Can 'date rape' only occur with drugs?
How do we recognize consent?

Sexual Assault

DOESN'T MEAN SHE'S SAYING YES.

What is Sexual Assault?

What is Consent?

How do Drugs Influence Consent?

alcohol and the brain

Messages get lost and
communication slows down in
the brain

Unfiltered behavior

- Depresses the brain
- **Removes the 'filter'** on your behavior
- More likely to fight or make risky decisions
- Removes the ability to consent to sex

Movement & Memory

Passing Out

Blacking Out

Depressing the brain with alcohol impairs the brain's ability to form memories

Teens and drinking

- Alcohol can drastically **alter the brain's connections and development**
- Can influence decision-making later in life

Coffee (or other
stimulants) can
counteract the effects of
alcohol and sober you up

FALSE

You should report sexual assault, even if you were drinking under age

TRUE

Having only 1 drink can
put you over the legal
limit to drive

TRUE

Alcohol is a depressant,
meaning it makes you feel
sad and depressed

FALSE

Rohypnol

What is Rohypnol?

“Roofies”

Background

- Used as treatment for insomnia and pre-surgery anesthetic
- **ILLEGAL** in the United States

ILLEGAL

Rohypnol ("Roofies")

- Date rape drug
- Odorless, colorless, tasteless

What are its effects?

What are its effects?

- Similar to alcohol
- Can't remember what happened while taking the drug

Can be **lethal** with alcohol

How does it work?

Rohypnol

KEY

Alcohol

LOCK

Brain Cell

What do you do if you think you've been drugged?
